To whom it may concern:

We support the LAMP Act. As an association that represents outfitters in the state of Colorado we have a close working relationship with the local and state governments. We would like to see them have more of an influence on the management entities to manage species and habitat conservation. The state and local governments have first hand experience with the actual environment and the species that inhabit it. Our members are in the field and also help local governments manage areas of open space.

Thank you for considering our views on the LAMP Act.

Thank you for your continued support. United we stand to

The COA Board of Directors and office staff
